

eServGlobal Announces New Contract with Mobinil Egypt

10 March, 2009

**eServGlobal Limited
("eServGlobal" or "the Company")**

eServGlobal Limited (LSE: ESG & ASX: ESV), a provider of end-to-end solutions, enabling smart communication and payment services for telecom operators on any generation network, today announced that Mobinil has chosen the eServGlobal platform to launch its Missed Call Alert (MCA) service.

Mobinil required a solution to notify subscribers of an attempted call when they are out of coverage or when the mobile is switched off. eServGlobal implemented an innovative IN based solution, closely coupled with eServGlobal's M@ilis Voicemail system, for the MCA service. This solution reduces costs by optimal utilisation of network resources and increases revenue by generating return calls.

With more than 20 million customers, Mobinil is the leading Mobile service operator in Egypt. After 10 years of collaboration between eServGlobal and Mobinil, this is a new extension of the relationship between eServGlobal and Mobinil.

Laurent Lafarge, Chief Executive Officer of eServGlobal, said, "We have a long history of working with customers in Egypt and are proud to bring an innovative solution to this important market. The benefits for operators offering this value-added service to their clients are clear. It is a cost-effective, quick return-on-investment solution designed to maximise profitability and fulfil customer needs without major capital investment."

Raoul Ramsis, Mobinil Deputy Director IN and Core services, said "Thanks to a great effort by the eServGlobal team, we were able to deliver the MCA service to our market in record time".
