

# **China International Forging Summit 2011**

## **Optimizing Forging Development Strategies**

26-27 May, 2011

Swissotel, Beijing Hong Kong Macau Center, Beijing, China

Beijing, China- China International Forging Summit 2011 will be hosted by Duxes Business Consulting Inc. on May 26-27 in Beijing at the Swissotel, Beijing Hong Kong Macau Center. The 2011 Summit will provide a platform to discuss the policies and regulations effecting China's rapidly expanding forging industry as a result of the recently issued Equipment Manufacturing Restructuring and Revitalization Plan, focused on heavy casting and forging.

The summit will provide participants the opportunity to familiarize themselves with China's policies and regulations on the forging industry and gain a better understanding of China's forging market. China had a reported annual production of open-die forgings amounting to 1.95 million tons in 2008, with a 580 ton steel ingot. In 2009, China launched a 185MN oil direct-driven hydraulic press, the largest in the world. It is expected that China's forging industry will be the fastest growing industry in years. The 2011 Summit provides an unprecedented platform for optimizing forging development strategies in China.

Leading international corporations will provide insight, experience and policy interpretation including: China First Heavy Industries, Southwest Aluminum Co., Japan Steel Works, Alstom Power, GE and Sheffield Forgemasters, among others. Central topics of the Summit include policy and regulation interpretation, taxation policies on imported technologies, demand and supply analysis of China's forging industry, latest steel and press technologies and emerging forging applications in aerospace, automobile, shipbuilding and power industries. The 2011 Summit is the premiere platform of China's forging industry, exploring business and identifying potential partners.
