Drilling commences at the Bygoo tin project

Thomson Resources is pleased to announce that drilling has commenced on a fourth phase of drilling at its Bygoo tin project near Ardlethan, NSW. The program is designed to follow up, confirm and extend the outstanding results from previous Thomson drilling.

The program will mainly target extensions to the Bygoo North and South greisen discoveries. Two holes will be drilled to verify the thickness of the greisen at Bygoo North and a number of further holes will target potential new greisens in the general Bygoo area.

About 1200m of drilling is planned in 10 to 12 holes and is scheduled to be completed prior to Christmas. Results are expected in early February.

For Thomson Resources

Eoin Rothery

Chief Executive Officer

The information in this report that relates to Exploration Targets, Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Eoin Rothery, (MSc), who is a member of the Australian Institute of Geoscientists. Mr Rothery is a full time employee of Thomson Resources Ltd. Mr Rothery has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Rothery consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
